

Hunter Animal Hospital
GENERAL SURGERY/PRE-ANESTHETIC BLOOD TESTING CONSENT

Name: _____

Patient: _____

Date of Birth: _____

Like you, our greatest concern is the well being of your pet. Your pet is scheduled for anesthesia and/or surgery. Before putting your pet under anesthesia, we will perform a full physical examination; however, some health conditions may not be detectable by physical exam only. To maximize patient safety and help alert the doctor to the presence of potential health problems, we recommend a pre-anesthetic blood evaluation be performed on your pet prior to undergoing anesthesia. These tests are similar to those your own physician would run were you to undergo anesthesia. In addition, the results of these tests may be useful later to develop faster, more accurate diagnoses and treatments in the event that your pet's health changes. State of the art equipment enables us to perform the pre-anesthetic blood profile within the clinic and we are committed to making the technology available to your pet.

Pre-Anesthetic Blood Test

Cost \$ 59.66 _____

Includes: CBC (Anemia, Clotting, Infection) _____ client initials
BUN, Creatinine (kidney), Glucose (Blood Sugar)
ALT, ALKP (liver), TP (Hydration), Albumin

Yes, Please complete the blood work that I have initialed and you have recommended prior to surgery on my pet.

Signature of owner _____ Date _____

No, I have selected to refuse the recommended pre-anesthetic blood work at this time and request that you proceed with anesthesia. I understand there are always potential risks when using anesthesia or performing surgery on an animal.
